QUICK COUPLING

Description
Quick coupling for use with Jobe valves equipped with DETACH Valve Seal Access System.

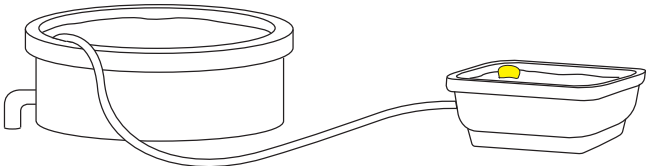

Features

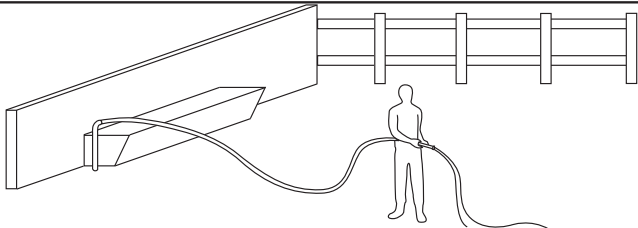

- Gives access to water system without the need for tools.
- Robust non corrosive construction.
- Suitable for use with Megaflow Detach and Topaz Detach trough valves

Applications

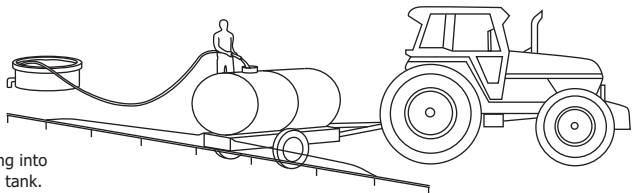

Quickly and easily connect a temporary trough to any trough fitted with a Detach equipped Jobe Valve. Ideal when break feeding paddocks with temporary electric fencing.

Quickly and easily connect a hose to any trough fitted with a Detach equipped Jobe Valve.

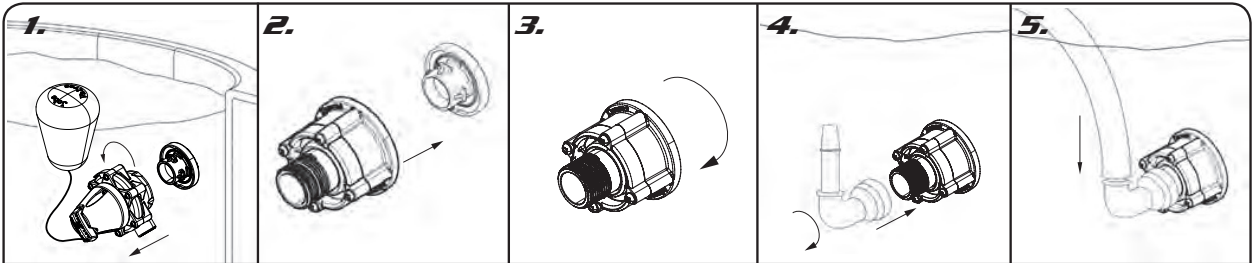

Ideal for filling spray tanks anywhere there is a trough with a Detach equipped Jobe Valve

NB: To avoid chemicals back feeding into water supply. Do not put hose into tank.

Megaflow

1. Remove TOPAZ or MEGAFLOW Valve by rotating 45° anticlockwise.

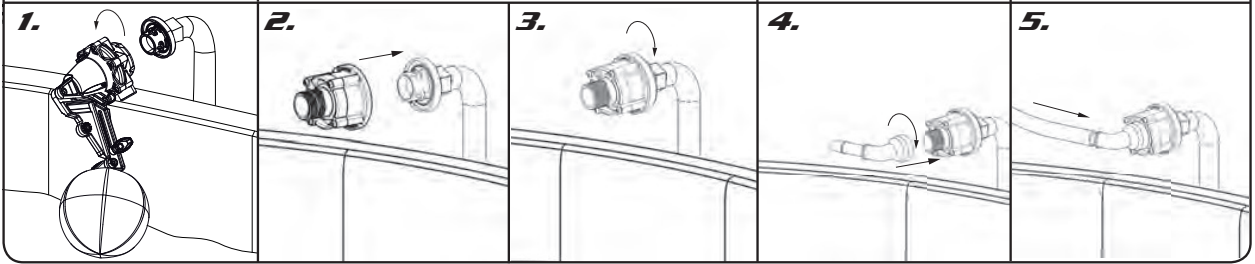

2. Push connect fitting into place and rotate 45° clockwise.

3. Screw pipe fitting onto connect.

4. Connect hose to 3/4" thread on connect.

5. Connect hose to 3/4" thread on connect.
